## Description

From its local origins in Sicily, the Mafia has become a global phenomenon and a widespread model of organized crime that threatens and corrupts the international economy, political systems and social environments. Yet film, television and literature have shown a continued fascination of the Mafia which has often been portrayed with romantic and even heroic connotations. In this course we will explore the representations of the Mafia in Italy through literature, film, and television; in the 20th and 21st centuries. Combining the analyses of historians, sociologists, and intellectuals, along with the testimonies of victims, we will challenge the stereotypes through which cultural productions envision the Mafia, and more importantly, we will explore how the Mafia envisions the world, in particular what is its ethics, its relationships with law, politics, business and finance, its ideas of femininity and masculinity, its portrayals of children. Examining both the visions on and by the Mafia through cultural, socio-political, and historical perspectives, this course aims to deconstruct the mythological eye and instead form an analytical eye with which to investigate and better understand the Mafioso universe and power, and the cultural Italian identity as well.
