

Reading list for new students of the Healthcare Management programme (intake September 2023)

To facilitate understanding in the first weeks of the course, we provide a reading list for the new students whose background is not in economics and management. These references are aimed at offering prospective students basic knowledge of the essential concepts in the main three areas of the programme: management, economics and statistics.

Management

Airoldi (2020), Principles of Management, EGEA Online.

Amore M.D., Minichilli A., Taricco P. (2021), Management 30060, Mcgraw Hill.

Economics

Folland S., A. C. Goodman, M. Stano (2017), The economics of health and health care. Routledge.

PART I: Basic Economics Tools

Chapter 1 Introduction

Chapter 2 Microeconomic Tools for Health Economics

Chapter 4 Economic Efficiency and Cost-Benefit Analysis

Statistics

Mark L. Berenson, Bernard M. Baruch, David M. Levine, Kathryn A. Szabat (2015), Basic Business Statistics, 13th Edition.
